Honeywell alarm components

3rd update for delivery situation of Honeywell alarm components

Valued sales partner

We would like to hereby inform you about the current status in regards to the Honeywell alarm components.

What	What is possible	Date
Components which are installed in the frame .	Are in stock and can be installed	immediately
Glass with glass monitoring	Delivery promised by Honeywell. Glasses are held back by Sky-Frame and will only be delivered after the components have been installed at the factory.	Q1/2019
	<i>Update: The production of the components has started but is still behind schedule. We still expect to be delivered with the components in Q1.</i>	
Bolt contacts	New delivery promised by Honeywell.	Q1/2019
	Option 1 Locking profile will only be delivered when the components are available.	
	Option 2 Locking profile will be produced and delivered without the components. Honeywell components will be retrofitted immediately by the sales partner on site upon availability. (Delivery of components by Sky-Frame) Time required for retrofitting: approx. 15 minutes; video tutorial available on B2B platform.	
	<i>Update: The production of the components has started but is still behind schedule. We still expect to be delivered with the components in Q1.</i>	

Analysis Unit Bus1/Bus2	New delivery of <i>BUS Analysis Unit 032211.17</i> promised by Honeywell. (Procurement by alarm system installer)	Q1/2019
	Update: <i>BUS Analysis Unit (BUS-2 / BUS-1) are on stock at Honeywell and ready for procurement (by alarm system installer)</i>	Imme- diately
Alternative solution for Analysis Unit Conventional	<p>Alternative solution for announced Analysis Unit Conventional promised by Honeywell.</p> <p>By means of a new firmware and in combination with the 2-relays-alarm group module 041220, the <i>BUS Analysis Unit 032211.17</i> has the same range of functions like a conventional Analysis Unit.</p> <p>Approach: Firmware for 032211.17 is currently under revision. Instruction and details by Honeywell are still outstanding.</p> <p>(Procurement by alarm system installer)</p> <p>Update: <i>First test series of the firmware showed the need for further optimization. We still expect, that the components are ready for procurement until end of Q1. (Procurement by alarm system installer)</i></p>	Q1/2019
Position monitoring (VdS class B or C)	Still available without restriction	imme- diately
Glass breakage monitoring of fixed panels (VdS class C)	Still available without restriction	imme- diately

Further procedure:

Conversations with several partners have shown that waiting for the components is considered by far the most reasonable approach and has in any case been accepted by the clients.

Please get in touch with your project manager if there are any questions regarding these information.

As mentioned before, any further communication regarding this topic will also be published on the B2B platform. This way, we can avoid annoying sales partners who are not affected by this issue by sending them numerous newsletters. Hence, if you oversee quotes or projects with alarm components, you will always be optimally informed if you check the News-section on the B2B platform.

Kind regards
